WORK EXPERIENCE

Rocscience Inc.

July 2024 - December 2025

Full-Stack Web Developer

Toronto, Ontario

- Developed **full-stack** features for RSLog, a geotechnical **ASP.NET Core** borehole logging application
- Scoped and developed the RSLog **API service** used internally and by client development teams
- Implemented **unit** and **integration tests** to ensure API reliability and prevent regressions
- Enhanced the gINT/DIGGS project file import functionality through bug fixes and feature additions
- Built a **JSON** export and import service enabling cross-instance project sharing between partnered clients
- **Redesigned** and **scoped** a UI/UX-focused query builder module for dynamic filtering of RSLog entities
- Performed database migrations and managed schema changes using **Entity Framework Core** ORM
- Utilized **AI-assisted workflows (Cursor)** to accelerate development tasks and improve code quality
- Leveraged **Azure DevOps** to plan user stories, track tasks and bugs, and publish deployments

Dayforce (formerly Ceridian)

May 2022 - May 2023

Full-Stack Web Developer Intern

Toronto, Ontario

- Worked **full-stack** developing the Dayforce **.NET** HR web software while participating in **Agile** practices
- Created and updated existing **UI widgets** for a new feature using **TypeScript** and the **Dojo Toolkit**
- Wrote business logic in **C#** to manage the application status of candidates in the job recruiting module
- Developed **SQL** scripts to simplify the manual **manipulation of back-end employee data**
- Optimized the running times of existing **SQL** queries present in the Data Access Layer
- Implemented **accessibility features** compliant with the **Web Content Accessibility Guidelines**
- Wrote **unit tests** to ensure new and existing code behaves as required

SKILLS

Languages: C#, JavaScript/TypeScript, SQL, Python, Java, C++, C, Bash, MIPS Assembly, R

Technologies/Frameworks: .NET, MS SQL Server, PostgreSQL, React, Node.js, Next.js, Express.js, MongoDB, Unity

EDUCATION

University of Toronto: St. George Campus

September 2019 – May 2024

B.S.: Computer Science Specialist, Math Minor

Toronto, Ontario

- **CGPA: 3.77/4.0** (High Distinction)

PROJECTS

Paw Pirates | **Unity, C#** | https://store.steampowered.com/app/2927380/Paw_Pirates/ | itch.io Jan 2024 - June 2024

- Worked on a **multi-disciplinary team** to develop a two-versus-two party game
- Awarded the **third place accessibility award** at the 2024 Level Up student games showcase (beta build)
- Programmed **background game logic** managing player movement, item interaction, and scoring
- Developed in-engine shaders using Unity **Shader Graph**
- Facilitated weekly **playtesting sessions**, implementing user feedback during each following sprint

HouseMate | **MongoDB, Express.js, React, Node.js** | github.com/connorburns19/HouseMate

December 2021

- Created a MERN stack web app that lets roommates to split group costs easily
- Allowed users to create and join houses, add expenses to their current house, and pay off expenses they owe
- Used the **React Context API** to store user data such as UserID and HouseID across the app during each session
- Utilized the **axios** library to create web requests throughout the client code
- Hashed passwords using **bcrypt** to increase database security
